CHAINS

The following field notes describe the dependent resurvey of a portion of the Gila and Salt River Base line, Township 1 North, Range 9 West, a portion of the east and west boundaries and a portion of the subdivisional lines, the subdivision of sections 16 and 19 and the metes-and-bounds survey of the Eagletail Mountains Wilderness Area Boundary, Township 1 South, Range 10 West, Gila and Salt River Meridian, Arizona.

Jesse B. Wright surveyed a portion of the Gila and Salt River Base Line in 1914. John F. Hesse surveyed the south, east and west boundaries in 1914. John F. Hesse and Jesse B. Wright surveyed the subdivisional lines in 1914. William E. Hiester and Ty White resurveyed the W. boundary in 1941.

The survey was executed in accordance with the specifications as set forth in the Manual of Surveying Instructions, 1973, and the Special Instructions dated April 15, 1998, for Group Number 827, Arizona.

Preliminary to the resurvey, the lines of the original survey were retraced and search was made for all corners and other calls of the record. Identified corners were remonumented in their original positions; lost corners were restored at proportionate positions based on the original record. The retracement data were thoroughly verified and only the true line field notes are given herein.

The distances and directions of all lines were determined by use of the Trimble 4400 real time kinematic survey system, and refer to the true meridian.

The geographic position of the corner of sections 1, 6, 7 and 12, on the E. bdy. of the Tp., as determined from a relative global positioning vector made to United States Coast and Geodetic Survey triangulation station "COURT 1948", with published latitude of 33°27'29.79051 N., and published longitude of 113°17'14.89736 W., NAD 83 (1992) is as follows:

Latitude: 33°21'46.29" N. Longitude: 113°13'44.37" W.
NAD 83 (1992)

The mean magnetic declination is 12 3/4° E.

General Description

The Eagletail Mountains Wilderness Area is located about 65 miles west of Phoenix, Arizona, in Maricopa, Yuma and LaPaz counties.

Terrain is nearly level to rolling, rugged and rocky and covered with vegetation of creosote, cacti and grasses. There are scattered ironwood and palo verde trees throughout the area.

Access is by way of Harquahala Valley Road, which connects to Interstate 10 near Tonapah, Arizona. There are numerous trail roads throughout the region.

T. 1 S., R. 10 W, Gila and Salt River Meridian, Arizona

CHAINS

Elevation is about 1600 feet above sea level.

Principle uses of the surrounding area include irrigated farming, ranching, and recreation.

There was mining activity in the past, but no current activity in the area was noted during the course of this survey.

The mean magnetic declination of $12\frac{3}{4}^{\circ}$ E., was derived from the United States Geological Survey computer "MAGPOINT", utilizing the Regional Magnetic Field Model for Epoch 1995 for the dates of survey.

FIELD ASSISTANTS

[illegible]

I, Joe R. Salazar, Cadastral Surveyor, HEREBY CERTIFY upon honor that, in pursuance of Special Instructions bearing date of the 15th day of April, 1998, I have dependently resurveyed a portion of the Gila and Salt River Base Line, Township 1 North, Range 9 West, a portion of the east and west boundaries and a portion of the subdivisional lines, subdivided sections 16 and 19 and executed the metes-and-bounds survey of the Eagletail Mountains Wilderness Area Boundary, Township 1 South, Range 10 West, of the Gila and Salt River Meridian, in the State of Arizona, which are represented in the foregoing field notes as having been executed by me and under my direction; and that said survey has been made in strict conformity with said special instructions, the Manual of Instructions for the Survey of the Public Lands of the United States, and in specific manner described in the foregoing field notes.
